To Whom It May Concern:

BIOS, LLC has worked with Edge Concrete Construction, LLC on several projects over the last 10 years. Most recently, Edge Concrete was the contractor trade for the California Science Center, World of Ecology, Phase II Jewel Tank and Life Support Systems, and also the Padilla Bay National Estuarine Reserve Aquatic and Interpretive Exhibit Remodel

Work on both projects was completed on schedule and budget. The management of their staff and sub-contractors was well done. The quality obtained from both the contractor and their subcontractors far exceeded specified performance requirements and design intent.

BIOS can therefore, without hesitation, recommend Edge Concrete Construction, LLC as a qualified exhibit contractor.

Sincerely,

W. Scott Horner
CEO, Design and Construction Principal
